

An Attempt to Estimate the Effects of Protecting Duties on the Profits of Agriculture

By John Morton

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 26 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1846 edition. Excerpt: . . . to this branch of agricultural industry; but, on the other hand, the excise duty to which hops are subject, furnishes correct statistical information respecting them, which is a great desideratum in the other departments of agriculture, and which enables us to reduce these exaggerated pretensions to their true value, and to demonstrate the disadvantage of protecting duties, and high artificial prices to the growers of even the most highly protected article to be found in the agricultural tariff. 174. Not to weary the reader with the details of investigations, which have cost us much labour, we shall content ourselves with a general statement of the results. 175. The average annual value of the hop crop does not exceed one part in one hundred and forty of the average annual value of the total agricultural produce of the United Kingdom. 176. The average number of...
