Pursuant to a legislative requirement, GAO compared student participation and program features in high school vocational education programs between the 1991 and 1994 school years, focusing on the: (1) availability of support services; (2) the extent to which program students attended college or found employment following graduation; and (3) extent to which schools have enhanced the quality of vocational education programs. GAO found that: (1) between 40 and 50 percent of students in special population groups participated in vocational education programs in 1990 through 1994, despite the removal of the set-aside requirement; (2) schools continued to offer all students access to support services at the same or greater levels in 1994 than in 1991; (3) there was no significant changes in the proportion of program students who attended college, went directly to work, or were unemployed; (4) the percentage of schools offering tech-prep programs increased from 27 percent in 1991 to 45 percent in 1994 and the percentage of students participating in the programs rose from 9 to 16 percent, respectively; (5) traditional school-to-work transition programs showed no major change in...
